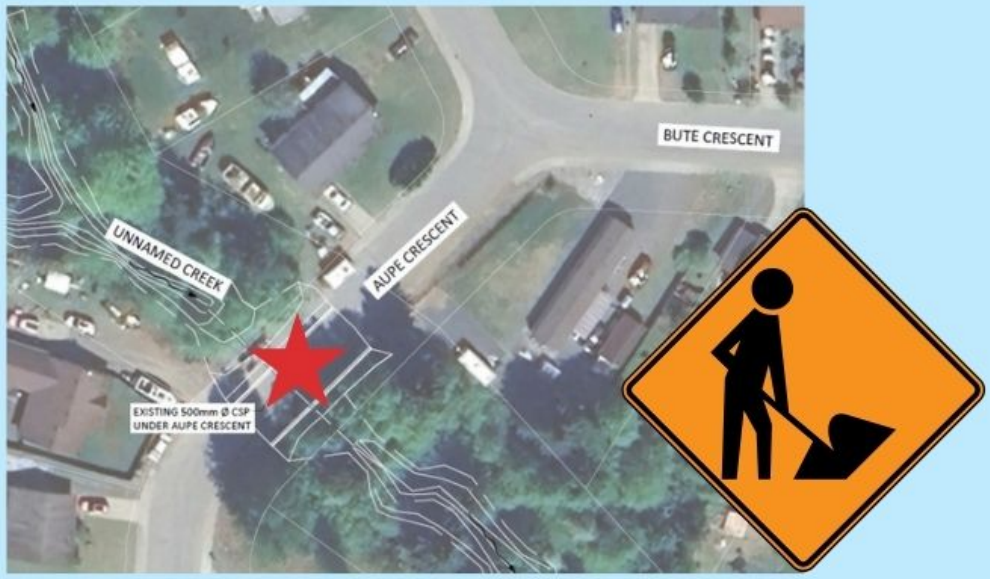
Aupe Crescent Culvert Replacement Updates

On **Monday July 21st, at 11 AM** we will be digging two test pits at Aupe Crescent to confirm the nature of the soils in preparation for the upcoming culvert construction. This work will involve a large back-hoe and some noise and general activity around Aupe Crescent. We do not anticipate any full road closures and the work will last only a few hours.

Black Creek Industries, along with civil and geotechnical engineers will be on site for this work. Since we are disturbing soil, and due to proximity to the stream, we will also have on site archaeological and χʷɛmałkʷu environmental monitors.


We appreciate everyone's understanding as we work to protect our community and our environment.
