Aupe Culvert Site Visit

On **Friday February 27** the team at Rewilding Water and Earth (RWE) – who have been supporting the stewardship work of the yiyχmɛštəm qʷaqʷtəm project – is planning a brief site visit to the new culvert at Aupe Crescent, and to look at other culvert replacement and restoration design sites nearby.

You may see a small group of up to 6 team members from RWE wearing high-vis vests, and walking around Aupe Crescent culvert on those days. Thank you for your patience!
